

DIY LAVA LAMP

Instructions:

1. Use a funnel to fill your bottle about 1/3 full with water.
2. Use the funnel again to add oil to your bottle until it is almost full. Leave about 2" of empty space at the top.
3. Add 4-5 drops of food coloring.
4. Break the Alka Seltzer tablet into a few pieces, then drop them in the bottle.
5. Cover the bottle and watch the lava move and fizz. When all the motion stops, you can add another Alka Seltzer tablet to start the reaction again!

Supplies for ONE Lava Lamp

- Empty 1-Liter Bottle
- Water
- Oil (Canola or Vegetable)
- Food Coloring
- Funnel
- Alka Seltzer Tablet (1 per bottle)

BONUS: Turn off the lights and shine a flashlight under or through your creation for the full lava lamp effect!
