

BUTTERFLY FEEDER

INSTRUCTIONS

Step 1: Punch 4 holes in the lid. Holes should be evenly placed so the butterfly feeder can be balanced once you hang it!

Step 2: Measure and cut 4 pieces of string, each being 18 inches long.

Step 3: Tie one string through each hole you made

Step 4: Decorate each string with beads!

Around 10 beads fit on each string, so do any pattern you like!

Step 5: Tie the ends of your strings all together at the top, add very ripe fruit, and hang the butterfly feeder wherever you want! Have fun watching the butterflies!

Supplies:

- Plastic lid (a cool whip container or ice cream tub lid works great!)
- Yarn/thick string
- Ruler
- Scissors
- Hole punch
- Beads (30 or so)
- Very ripe fruit
