

JELLO FISH BOWL

INSTRUCTIONS

Step 1: Pour nerds into bottom of container - approximately 1/4 cup

Step 2: Prepare jello according to box instructions.

Let cool for 15min in fridge.

If you want a lighter, more transparent blue color, then we recommend using yellow lemon Jello and adding a very small drop of blue food coloring to the mix. This will give you Caribbean blue colored "water."

Step 3: Gently pour the cooled jello into each glass, then transfer to fridge to set

Step 4: Using a butter knife, cut slits into the jello where you will push in your fish. You can also leave the fish on the top so they are more visible.

Supplies:

- juice glass, baby food container
- swedish fish, gummy sharks
- nerds candy
- blue jello

Special Note

Make these immediately before serving. Unfortunately these are NOT a make-ahead treat. The longer these sit, the more the Nerds will bleed and the gummy fish will become soggy.
